

## ENVIRONMENTAL POLICY

***MISSION: to ensure reliability, availability and advanced development of the energy system of Kazakhstan.***

The main goal of the environmental policy of KEGOC is to ensure reliable and environmentally sound management of the National Power Grid (NPG).

In accordance with the fundamental aim of the environmental policy, KEGOC undertakes the following obligations:

- ensure that KEGOC's operations comply with international and national environmental laws and the requirements of international environmental management standards, sustainable development as well as other requirements to which KEGOC subscribes;
- ensure that the carbon footprint of NPG management and development is reduced to ensure environmental protection;
- level up environmental safety by eliminating negative environmental impact through the implementation of the best available technologies;
- ensure technological upgrading and gradual decommissioning of obsolete equipment and introduction of best available technologies in the provision of services;
- ensure energy saving and the rational use of natural and energy resources in KEGOC's operations;
- ensure the identification of significant environmental impacts of KEGOC's operations with potential negative environmental impact including the development and implementation of mitigation measures;
- continuously enhance the environmental management system;
- keep stakeholders informed about environmental protection activities;
- raise the awareness of KEGOC employees on the environmental management system, the competence of KEGOC employees who manage environmental protection issues.

***The management team of KEGOC assumes responsibility for the implementation of the environmental policy, the provision of all necessary resources, and integration of the policy into all business processes of KEGOC.***

Chairman of Management Board
